

## Deep Energy Retrofits with Beyond Green, Do the math

Lets do the Math (Apples for Apples)

Electric/Gas Water Heating

Solar Water Heating

Pay utility Company 100% of your water heating bill.

vs.

\* Eliminate 70 to 95% of your water heating bill.

Send away 100% of the money.

vs.

\* Keep 70 to 95%, and put the money in your own pocket.

The money is gone, with little to show for it.

vs.

\* Your home equity value increases because of your new system.

Money drained out of your community to pay coal companies and gas processors.

vs.

\* Money enriches the local economy and supports local trades people.

At the mercy of utility Co. (blackouts, price increases etc.)

vs.

\* You own it, your own utility company and hot water factory.

Depleting natural resources.

vs.

\* Unlimited energy supply.

More dependent

vs.

\* More self-sufficient.

Creates air pollution. Puts heavy toxic metals into our air and water.

vs.

\* Creates no pollution. Improves health for you and our planet.

You go with the flow and take no responsibility and global destruction increases.

vs.

\* You take a stand, do your part, and you walk the walk. You are a good steward of our planet.
